Tier 1 (as a percentage of total risk exposure amount)	14.09%
Total capital (as a percentage of total risk exposure amount)	16.97%

## Capital requirements

The internal process for the assessment of capital adequacy to risks is integrated in the administration and management process of Banca Transilvania and in its decision making culture, according to which the management body must ensure the proper identification, measurement, aggregation and monitoring of risks, the preservation of internal capital levels adjusted to the bank's risk profile, as well as the use and development of sound risk management systems.

The following computation methods are used by the Bank and the Group:

- Credit risk: RWA (risk weighted assets) standardized approach;
- Market risk: capital requirements with respect to the foreign exchange risk and the trading portfolio are calculated based on the standardized approach;
- Operational risk: capital requirements for the coverage of operational risk are calculated according to the basic indicator approach.

The Group manages its capital base in a flexible manner, by monitoring regulatory capital requirements, by anticipating the adequate adjustments required for the achievement of its objectives, as well as by optimizing the structure of assets and shareholders' equity.

Planning and monitoring take into consideration the total own funds (core tier 1, additional tier 1 and tier 2) on one hand and risk-weighted assets (RWA) on the other hand.

## CAPITAL REQUIREMENTS

### Template 4: EU OV1 – Overview of RWAs

<b>29</b>	<b>Total</b>	<b>55,350,344</b>	<b>51,581,043</b>	<b>4,428,028</b>

## Leverage

Within the framework of EU Regulation no.575/2013 and in addition to the total capital requirements, the leverage ratio was implemented as a new instrument to limit the risk of excessive indebtedness.

The leverage ratio is the ratio of capital to the leverage exposure, specifically the tier 1 capital in relation to unweighted exposure on and off balance sheet.

As of 31.03.2020, the leverage ratio according to the transitional definition is 7.71% in comparison with 8.46% at 31.12.2019.

	Capital and total exposures	Applicable amount RON Thd
20	Tier 1 capital	7,796,787
21	Total leverage ratio exposures	101,079,922
<b>22</b>	<b>Leverage ratio (transitional)</b>	<b>7.71%</b>
EU-23	Choice on transitional arrangements for the definition of the capital measure	Transitional
